

**NPN Plastic-Encapsulate Transistors**

**Description**

BD649 are NPN silicon power darlington transistors with diode and resistors in a TO- 220 AB plastic package. The collectors of the two transistors are electrically connected to the metallic mounting area. These darlington transistors for AF applications are outstanding for particularly high current gain. Together with BD650, they are particularly suitable for use as complementary AF push-pull output stages

**Features**

- ◆62.5 W at 25°C Case Temperature
- ◆8 A Continuous Collector Current
- ◆Minimum hFE of 750 at 3 V, 3 A
- ◆Low collector-emitter saturation voltage
- ◆Complementary to BD650

**Absolute Maximum Ratings (Ta=25°C)**

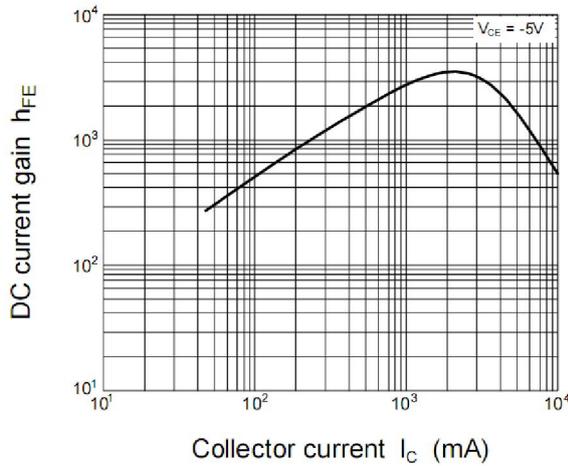

| Parameter                              |           | Symbol          | Value   | Unit |
|--|-----------|-----------------|---------|------|
| Collector-Base Voltage                 |           | $BV_{CBO}$      | 100     | V    |
| Collector-Emitter Voltage              |           | $BV_{CEO}$      | 100     | V    |
| Emitter-Base Voltage                   |           | $BV_{EBO}$      | 5       | V    |
| Collector Current (DC)                 |           | $I_C$           | 8       | A    |
| Collector Current (Pulse)              |           | $I_{CP}$        | 12      | A    |
| Base Current                           |           | $I_B$           | 150     | mA   |
| Collector Dissipation                  | Ta =25 °C | $P_C$           | 2       | W    |
|  | Tc =25 °C |                 | 62.5    |      |
| Junction Temperature                   |           | $T_j$           | 150     | °C   |
| Storage Temperature                    |           | $T_{stg}$       | -55~150 | °C   |
| Thermal Resistance junction to case    |           | $R_{\theta JC}$ | 2       | °C/W |
| Thermal Resistance junction to Ambient |           | $R_{\theta JA}$ | 80      | °C/W |

**Electrical Characteristics (Ta=25°C)**

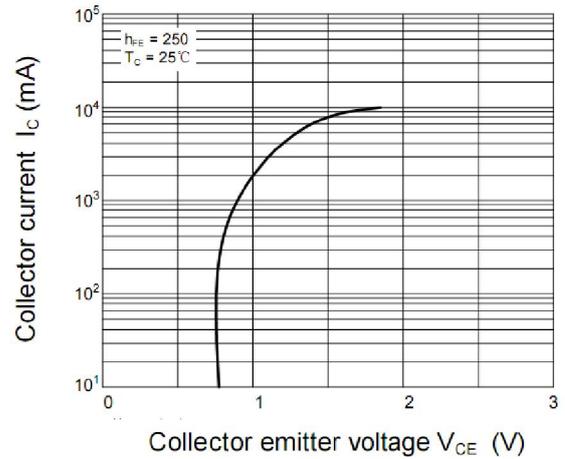

| Parameter                             | Symbol        | Conditions  | Min                | Typ | Max | Unit |
